

INTERACTIVE REMOTE CONTROL OF AUDIO OR VIDEO PLAYBACK AND SELECTIONS

ABSTRACT OF THE DISCLOSURE

A system for an interactive remote control wired or wireless, of an audio or video playback application running on a personal computer or other computing platform. This interactive control includes playback of current audio or video content or selection of new audio or video content or lists of content for playback. The wireless interactive remote control device, or navigator, may contain an audio or video browser for simplifying interactive control by integrating control of a variety of content, for example, music, video, and Internet radio, independent of whether this content exists locally on the computing platform or is accessed over the Internet or some other computer network.
